Order Shipping Test

After verifying the content and pricing of your items and placing a test order, you're ready to test order shipping. Don't worry, it's pretty easy!

Even though this is a test shipment, you must provide a valid shipment tracking number. But you will NOT physically ship the test order.

1 Acknowledge test order

Gather the details of the test order you're using to test shipping and update the order status to **Acknowledged**. You can do this in Seller Center or by making an API call.

2 Verify test order details

Next, carefully review the order details to confirm they are correct. Pay special attention to the order's sales tax and shipping charges.

3 Process test order shipment

Next, process the fulfillment/shipment of the test order. **Do not ship the item!**

Do this by updating the status of the test order to Shipped and provide these shipping details:

- Carrier Method
- Shipping Method
- Tracking Number
- Tracking URL

Great job!

Last step on the next page.

Step-by-Step Instructions

4 Verify order status in Seller Center

Confirm the order status successfully updated to **Shipped**. You can do this by going to Seller Center > Order Management > Dashboard.

Order Details									
PO No: 4576194540587 Order No: 5031634866635		Ship By: 19-Aug-2016 Order Total: \$17.99		Name: Walmart Customer Email: walmartcustomer@walmart.com Phone: (999) 999-9999		Address: 850 Cherry Road, San Bruno, CA, 94065			
	Product Name	S K U	Shipping Method	Qty Req	Qty Updated	Status	Carrier	Tracking No	Tracking Url
12	1LB Raw Cashews	RWGW01	STANDARD	1	1	Shipped	FedEx	2929292929	carrier.com/2929292...

Before you launch, finish testing!

Review all **QuickStart guides below to complete all testing scenarios before launch**. After you test **ALL scenarios**, you can reset the prices and inventory levels for your items.
